EXPERIENCE

Freelancer/Consultant

Sprint 2022 – Ongoing | Rexford, MT

- Created a NextJS web application, arcadia.yt, for ArcadiaSMP that leverages Google's YouTube api to aggregate video uploads from members increasing viewer engagement.
- Leveraged cutting-edge AI technology such as ChatGPT, ElevenLabs, and Azure TTS to create interactive content tools.

Associate Game Programmer

October 2019 – July 2021 | Manhattan Beach, CA

- Worked closely with artists to make functional UI implementations based on art mock-ups.
- Extended our use of Unreal's replication graph to better enhance our network performance.
- Created engine patches to address unimplemented, or partially implemented, features of UE4 that were necessary for a full-game launch.
- Project lead on the Developer and Live Operations portal built in Django to assist with the live-service of Pac-Man: Mega Tunnel Battle.

PROJECTS

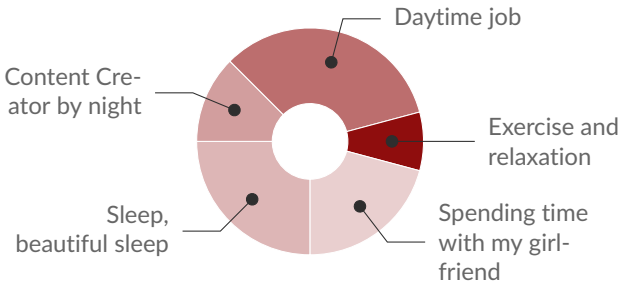
Arcadia Website

A NextJS application that leverages Google's YouTube api to aggregate video uploads from members of Arcadia.

Arcadia Socials Application

A Python application that leverages YouTube's RSS feed and Google's YouTube api to aggregate video uploads from members of Arcadia and posts them to X (formerly Twitter).

A DAY OF MY LIFE



MY LIFE PHILOSOPHY
