Website: https://mfryer.us

My name is Michael Fryer. I am a software developer with over 5 years of on-and-off web development experience. I am currently pursuing a Masters in Applied Data Science at Frankfurt School of Finance and Management with an expected graduation date of Summer 2027. I have previously worked in the games industry for Heavy Iron Studios in Manhattan Beach, CA as an Associate Game Developer. During my tenure at Heavy Iron, I was the lead UI developer on PacMan: Mega Tunnel Battle, our UE4 game for Bandai Namco. In addition to my responsibilities on the game UI, I also created the Live Ops portal that Bandai Namco would use once the game was shipped. This Live Ops portal was built using Django and deployed via AWS. During covid-19, I pivoted to content creation, focusing on building my online presence and developing technical solutions for creators. In summer of 2025, I started pursuing a Masters in Applied Data Science from Frankfurt School of Finance and Management.

I believe I am a qualified candidate for this position as outlined in my attached resume. In addition to the skills and job experience listed in my resume, this pivot in my professional career has allowed me to develop a unique set of skills, including software development, video editing, communication skills, project management, and data analysis. My experience creating media content has given me a deep understanding of presenting information in an engaging and accessible manner, which I believe is crucial for a role as a Data Engineer. Furthermore, my ongoing education in data science equips me with the latest analytical tools and methodologies, enabling me to contribute effectively to data-driven decision-making processes within your organization. I am excited about the opportunity to bring my diverse skill set and experiences to Hyundai Mobis and contribute to its innovative projects.

I look forward to hearing from you about the position and my qualifications. My website is available at https://mfryer.us. Please contact me at +49 1525 5849914, or at michael.d.fryer@gmail.com for further questions regarding my qualifications. Thank you for your time and the potential opportunity to further discuss my qualifications for this position.

Sincerely,
Michael Fryer
